DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19, drawn to a method for detection of an analyte in a sample with a three-dimensional array, classified in class 436, subclass 172.
 - II. Claims 20-37, drawn to a method for detection of an analyte in a sample with a two-dimensional array, classified in class 436, subclass 129.
 - III. Claims 38-46, drawn to a method for detection of an analyte in a sample with three-dimensional arrays and the arrays are suspended in solution, classified in class 436, subclass 164.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of group I-III are unrelated and independent inventions. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions as claimed have different effects. The feature of a three-dimensional array and detecting the change in fluorescence of group I is not required by the claims of the other groups. The feature of a polymerized diacetylene of group II is not required by the claims of the other groups. The feature of detecting the change in polarization of the fluorescence of group III is not required by the claims of the other groups.

Art Unit: 1641

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
